

▲ GUARD RAIL SYSTEM

▲ PART NO: 983000

- ▲ FLEXIBLE EXPANDABLE SYSTEM
- ▲ DURABLE AND STABLE CONSTRUCTION
- ▲ CUSTOM BRANDING POSSIBLE
- ▲ A SYSTEM OF INTERCHANGEABLE FEET AND ACCESSORIES
- ▲ COMPETITIVE PRICING WITHOUT INTERMEDIARIES

A stable and fast-mounted system for blocking and temporary enclosures, designed to meet demanding environments. The Guard rail system is available in three variants Guard rail, Barrier and Fence, all in different lengths. They can easily be connected by integrated hooks and loops, and set at different angles.

The system consists of several interchangeable parts such as three models of ground support and a toe board holder. Completion can be done retrospectively to accommodate specific needs. The Guard rail system can be used as temporary blocking in traffic environments, on construction sites and at events etc. The system is designed for ergonomic and cost-effective handling. It can also be equipped with reflexes for increased visibility. The products are available as hot dip galvanized, and galvanized and powder coated. We also offer custom profiling with powder coating in desired color and logotype.
